Adjustment Can’t Be Deleted

Troubleshooting · https://atsfleetmanagement.com/docs/adjustment-cant-be-deleted/

Description

This issue occurs when users attempt to remove an adjustment but the system prevents deletion.

Possible Causes

- Reporting period locked
- User permission restrictions
- Adjustment tied to filing data
- Administrative controls
- Audit protection settings

Resolution

1. Review filing status.
2. Verify user permissions.
3. Contact your administrator.
4. Create an offsetting adjustment if deletion is restricted.
5. Document all changes.
