Fuel Receipt Image Too Blurry

Troubleshooting · https://atsfleetmanagement.com/docs/fuel-receipt-image-too-blurry/

Description

This issue occurs when uploaded receipt images cannot be processed due to poor image quality, preventing accurate fuel data extraction.

Possible Causes

- Camera movement
- Low-resolution image
- Poor lighting
- Dirty camera lens
- Receipt too far from camera
- Image compression

Resolution

1. Clean the device camera lens.
2. Place the receipt on a flat surface.
3. Ensure adequate lighting.
4. Hold the camera steady.
5. Capture the entire receipt.
6. Verify text is readable before uploading.
