How Do I Calculate Fleet MPG?

FAQs · https://atsfleetmanagement.com/docs/how-do-i-calculate-fleet-mpg/

Overview

Fleet MPG (Miles Per Gallon) is one of the most important figures used during IFTA calculations.

Formula

Fleet MPG equals:

Total Fleet Miles ÷ Total Gallons Consumed

Example

- 100,000 miles
- 16,000 gallons

Fleet MPG = 6.25 MPG

Why MPG Matters

MPG determines fuel consumption allocation among jurisdictions.

Advanced IFTA Advantage

Advanced IFTA automatically calculates fleet MPG using imported mileage and fuel records.
