# How Does Advanced IFTA Import ELD Data?

FAQs · https://atsfleetmanagement.com/docs/how-does-advanced-ifta-import-eld-data/

## Overview

Advanced IFTA connects directly to supported ELD providers to retrieve vehicle mileage and trip information required for IFTA reporting.

## Imported Data

Depending on the provider, imported data may include:

- Vehicle identification
- Trip dates
- State mileage
- GPS route information
- Driver information
- Odometer readings

## Benefits

Automated data imports reduce manual entry, improve accuracy, and simplify quarterly reporting.

## How Advanced IFTA Helps

Once connected, mileage data is automatically organized into state-by-state reporting summaries used for IFTA calculations.
