How is State Mileage Determined?

FAQs · https://atsfleetmanagement.com/docs/how-is-state-mileage-determined/

Overview

State mileage represents the total miles traveled within each jurisdiction during the reporting period. These miles are used to calculate fuel consumption and tax liability for each state or province.

How Mileage is Calculated

Mileage is typically determined using:

- ELD data
- GPS tracking
- Trip reports
- Routing software
- Driver logs

Why State Mileage Matters

Accurate state mileage ensures taxes are allocated correctly among jurisdictions and reduces audit risk.

How Advanced IFTA Helps

Advanced IFTA automatically calculates state mileage using imported ELD and routing data, reducing manual calculations.
