Unsupported Adjustment Detected

Troubleshooting · https://atsfleetmanagement.com/docs/unsupported-adjustment-detected/

Description

This issue occurs when an adjustment exists without sufficient documentation to support the modification during an audit or compliance review.

Possible Causes

- Missing supporting documents
- Incomplete notes
- Adjustment entered manually
- Missing route calculations
- Missing fuel receipts

Resolution

1. Review adjustment records.
2. Attach supporting documentation.
3. Add explanatory notes.
4. Verify adjustment calculations.
5. Retain records for audit purposes.
