What is a High MPG Exception?

FAQs · https://atsfleetmanagement.com/docs/what-is-a-high-mpg-exception/

Overview

A High MPG Exception occurs when reported fuel efficiency exceeds expected operational performance.

Common Causes

- Missing fuel purchases
- Missing fuel receipts
- Incorrect mileage calculations
- Data import errors

Why It Matters

Unusually high MPG values frequently indicate reporting discrepancies.

Audit Considerations

Auditors often review unusual MPG values during compliance examinations.
