When Should the Mileage Calculator Be Used?

FAQs · https://atsfleetmanagement.com/docs/when-should-the-mileage-calculator-be-used/

Overview

The Mileage Calculator should be used whenever mileage cannot be accurately obtained from ELD records.

Common Situations

- ELD malfunction
- Driver forgot to log trip
- Temporary vehicle use
- Rental equipment
- GPS interruption
- New vehicle setup

Why It Matters

IFTA requires all qualified miles to be reported, regardless of whether an ELD captured the trip.
